

# PEAK SOLUTIONS

*Providing solutions  
and personnel that work!*

Specializing in Project Controls,  
Project Management, Engineering, QA/QC,  
Construction Management, Work Management,  
Safety, and General Staff Augmentation

# Overview

Peak Solutions is a technical services company supporting government agencies and commercial clients in fossil and nuclear power, petrochemical, and large construction projects.

Peak Solutions provides specialists in Project Controls, Project Management, Engineering, QA/QC, Construction Management, Work Management, Safety, and general Staff Augmentation.

## Offices:

Albuquerque, New Mexico

Amarillo, Texas

# Services

---

**Project Controls:** estimating, planning and scheduling, budgeting and cost control, P3e implementations, training and database administration, and earned value management systems (EVMS)

---

**Engineering:** all disciplines (civil, structural, mechanical, electrical, I&C, HVAC, and fire protection) including design engineers, construction field engineers, and systems and maintenance engineers

---

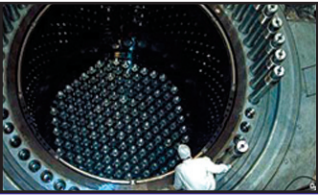

**Staff Augmentation:** Temporary technical personnel in all areas and disciplines, in support of nuclear power plants and DOE projects and programs, such as nuclear weapons, waste management, facilities modification and new construction

---

**Project Management:** major modifications, new construction, and IT systems projects

---

**Construction Management:** owner's reps, superintendents, field engineering, and safety specialists

---

**QA/QC Programs:** evaluations/development, procedures, audits, inspectors, receipts, and vendor surveillance

---

**Safety:** program development and evaluation, DOE authorization basis, and construction safety specialists

# Clients

## Holmes & Narver

Los Alamos nuclear facilities design and engineering

## American Electric Power (AEP)

Nuclear and fossil power generation

## Sun Technical

Engineering and technical services for nuclear and fossil power projects

## Shaw Group

International EPC for Power and Petrochemical

## CPS Energy

Fossil power plant construction, San Antonio, TX

## Florida Power & Light

Nuclear power generation

## Washington Division of URS

National Enrichment Facility (NEF) construction project in Eunice, NM

## Arizona Public Service

Owner/manager of Palo Verde Nuclear Generating Station

## NSTec

Prime contractor at the DOE Nevada Test Site

## Teledyne Brown Engineering

DOE Projects

## Louisiana Energy Services (LES)

National Enrichment Facility Project

# Project Controls

- **Primary focus** is supporting large, technical projects, such as new construction, plant modifications, retrofits, and refueling outages with highly experienced project controls personnel (schedulers, estimators, cost engineers, and work package planners).
- **EVMS experts** in defining and planning appropriate controls systems with a graded approach, implementation of EVMS processes, training, and formal certification audit preparation. Significant experience planning, estimating, creating and maintaining baselines for a wide range of large, highly technical (nuclear) commercial and DOE projects.
- **Historical estimating** database and templates.
- **Experience with Primavera P3e** implementations and enhancements, including database administration.

# Staff Augmentation

- Project Managers
- Project Controls (schedulers, estimators, cost engineers, and EVMS experts)
- Engineering (mechanical, electrical, civil, and I&C)
- Construction Managers and Field Engineers
- Designers
- Contract Administrators
- Procurement Specialists
- QA/QC (NQA-1)
- Safety experts
- Fire Protection
- IT experts

# Senior Consultants

- **Consultants** with an average of 40 years of senior management experience on a wide range of projects, available on an as-needed basis
- **EVMS experts** who have designed, implemented, trained personnel, and supported formal audits for both individual projects and company wide systems
- **Practical**, no-nonsense approaches from experts who know how to make projects and programs succeed
- **Direct experience** in conceiving, initiating, managing, and completing mega projects (\$1B+) and technically complicated programs
- **Extensive design**, construction, and operations experience at nuclear power plants and NRC-licensed facilities
- **Technical expertise** in the nuclear weapons programs
